## Research Assistant for Study Operations - HiWi (part-time)

ki:elements pioneers speech-based biomarkers as tools for clinical research. We embed our speech biomarkers in various usage scenarios and work with top players in the pharmaceutical, digital health and other industries.

We are looking for an enthusiastic and skilled student to join our team as a research assistant HiWi:

### **Your responsibilities:**

- Help and support with the set up of clinical studies in our data collection platform and recruitment platforms, such as Prolific, SosciSurvey, etc.
- Overlook participant recruitment including the contact and support of participants.
- Write and support with reports and slidedecks about study progress as well as study relevant documents.
- Assist in testing of our data collection applications and study protocols.
- Collaborate with our team to re-work study designs for improved feasibility.

### **Requirements:**

- Good communication skills in English with the ability to work independently and responsibly.
- Currently enrolled in a German university and pursuing a degree in Psychology, Health or Educational Sciences or another study involving research in humans.
- Interest in learning basics of speech data collection, speech biomarkers, procedures and regulations in clinical trials and research.
- Strong organizational skills, attention to detail with the ability to manage multiple projects simultaneously.

### **What we offer:**

- HiWi student position in a 4-day work week company (Monday - Thursday).
- Flexible remote work with one office day per week (for those located near Saarbrücken).
- Opportunity to be part of a young, dynamic and collaborative team.
- Compensation 603€ / month

If our profiles match, we would be delighted to hear from you. Please contact us with your resume and a brief note why we should work together in the future:
