

A Student Assistant (Hilfswissenschaftler) for Sensor Research Project

KIST Europe is looking for a student research assistant to work with us. The first contract period is from August to December 31. The start date is adjustable in August. The contract is valid only until December 31, 2021 and it could be extended after the first period work evaluation.

- 16h – 20h per week
- Salaries are paid according to the Institute's internal student assistant standards.

Brief description: Synthesis of substances specific to the substance to be detected, synthesis of signal transducers, and sensing signal analysis etc.

The tasks include:

- Material synthesis and purification
- Basic physical property measurement
- Sample preparation for target sensing
- Basic analysis of numerical data

Requirements:

- Registered students majoring in Chemistry/Chemical Engineering/Material Science
- Good technical communication in English

Preferences:

- Completion of 3 or more semesters of related majors
- Master's course students preferred
